ABSTRACT

Rosadan, Robbi Rizal. 2018. *Register Used by “HSFC Jombang” Motorcycle Community in Social Media Whatsapp Massager*. Thesis. English Department, Faculty of Arts and Humanities. The State Islamic University of Sunan Ampel Surabaya.

Advisor: Prof. Dr. Zuliati Rahmah, M.Pd.

Key words: *Register, Honda Street Fire Community Jombang, register function*

This thesis examines the registers contained in the motorbike bike community. This study focuses on the word register found in the group WhatsApp motorcycle community Honda Street Fire Community Jombang (HSFCJ). The purpose of this study was to determine the registers used by the motorcycle community and to explain the register functions used by the motorcycle community found in WhatsApp group chats.

This is a descriptive qualitative research and data are taken from group whatsapp conversations, observations, and interviews with community members on motorcycle. The study participants were all members of the motorcycle community and five group members interviewed. The study was conducted by researchers for two months, March and April.

As a result the researcher found thirty two register words used by HSFCJ members. From the thirty two register data, the researcher found three types of registers used in this motorcycle community. They are fourteen registers in Indonesian, seventeen registers in English, and one register in Java. The researcher obtained the register function used by this motorcycle community. The interview results show that there are four register functions used by group members. They are functions (1) to show intimacy, (2) to show prestige, (3) to increase solidarity, and (4) to show identity.

Overall, from the findings of this study, the researcher has proven that registers exist at Honda Street Fire Community Jombang (HSFCJ). This research was able to reveal the word register used in the motorcycle community. Then each word register has meaning and function. The researcher suggests to the next researchers who might conduct research in the field of registers to analyze other elements and use other methods. There are many ways to do research in the register field at different points of view. Subsequent researchers can also combine other theories to find new results. Other communities can also be an interesting new object to study.

APTER I INTRODUCTION

CHAPTER 1

There are some points to discuss in this topic; they are the background of the study, statement of the problem, objectives of the study, the significance of the study, scope, and limitation, and definition of key terms.

1.1 Background of Study

Language is the most important element to interact with the others it is used for communication tool in their social life. Language and society cannot separate because language is a communication tool used by certain people to create interaction and communication, in their social life. Like what is said by Wardhaugh (2006) that language allows people to say things to each other and express communicative needs. Since every people who live in certain social life have their own languages, that is why language has it is own characteristics it depends on when, where, and with whom the languages are used. Underlying the statement before, it concludes that communication happened as long as people do the interaction with others.

Communication is happened in social life, mentioned communication of people at school, house, office, market, and others. Furthermore, communication is not only done directly by a person or a group of communities. Communication can be done through social media, with social media a person or a group of communities can communicate faster and more often. Social media is diverse, ranging from WhatsApp, Facebook, E-mail, Instagram, twitter etc. In Indonesia,

most people use social media WhatsApp to communicate both personally and group.

Ferguson (1994) stated that people participating in recurrent communication situations tend to develop similar vocabularies, similar features of intonation, and characteristic bits of syntax and phonology that they use in these situations. It means that register is a variant of a language that is used in the particular jobs or communities to describe the specific vocabulary associated with different occupational groups and usually cannot be understood by other people or other groups of the community. It could be described as an occupational style. Register helps people to express their identity at a specific time or place and how they seek to present themselves to others. Different social interaction also becomes the factor of the different register in using language. Such as the

This different language between communities is also happening in the motorcycle community. There are a lot of new words being created in the motorcycle community, but another group or community outside did not understand the new words as well as the member of the motorcycle community itself. This factor leads the researcher to analyze and describe the meaning the use of the new words which may include to the register which is used by the motorcycle community.

3

existed is not the same in the real world in the practice in our daily life. In some occasions, the words which used in the movie dialogue have been changed in meaning which has a different meaning in the words that we use in our daily life. This happens because the words must be matched with the movie stories context. There is a lot of research about register that used the movie as an object

From the previous researches above, the researcher found the gap for the recent research, the data in the previous researches were taken from the movie and Facebook page. In this recent research, the data is collected from the WhatsApp group of community. The difference is in the sense of situation of the use and the benefit during register is used in the community.

To fill the gap that existed in the previous researcher, the researcher joined group WhatsApp of the motorcycle community Honda Street Fire Community

Jombang 'HSFCJ' to get the data about the register. It is intended to get the sense of the use and the benefit during register is used in the group of the community directly among the community. In this case, the researcher makes sure that the register is actually used in the community. Until the recent researcher writes this proposal thesis, the recent researcher has not found the register research talks about registers exist among the motorcycle community daily communication, especially through WhatsApp. The recent researcher decides to focus on WhatsApp group communication because WhatsApp is popularly used today. So, the communication is up-to-date and the possibility of the register used is higher in using than another social media.

To analyze the register that is used by motorcycle community, the researcher analyzed the component of situational factors in this community, it can be analyzed through the setting of the place, time, and in what environment the languages are used. The situational factor in register is also suggested by Halliday (1978) said that to analyze the situational factor underlying the use of register, he began to develop his influential framework in analyzing the context of situation by these three parameters; FIELD: what the language is being used to talk about; TENOR: the role relationships between the interactant; and MODE: the role language is playing in the interaction. Furthermore, besides to analyze the situational factors of the register, the function of the register has its own importance to be analyzed. After knowing the situational factor, there are also register function. Halliday mentioned that the function of registers appears as an instrumental function, personal function, social relationships or interactional

function, regulatory function, representational function, heuristic function, and imaginative function.

In this study, the researcher focused on the analysis of a sociolinguistic study of the register as a kind of language variation. The researcher uses the motorcycle community because this community is closely related to society and the researcher has not found any study that discusses motorcycle community before. The weakness of the previous study is almost all previous researches used movie in their research. In the movie, the script is planned before. And although there are so many registers in the movie, every people can interpret and know the meaning of that register. In this case, the register may be well known by people who have watched the movie; it is not only understood by the community in the movie.

From those gaps, the researcher conducted research about the register which is existed in WhatsApp group chatting of the motorcycle community HSFC Jombang. The motorcycle community is a community very close to the environment. Even every activity is little or much going to be related to the community. Sometimes conflicts occur between citizens and the member of the motorcycle community. This is bad for both parties. This research register aims to create peace between the member of the motorcycle community and the environment and also to create a mutual understanding between the member of the motorcycle community and the environment.

HSFCJ is the community for the Honda CB150R user. HSFCJ is located in Jombang, East Java. This community was created because of the unity in

Gathering, Touring, and Modifying. And the main reason for this community is passion and kinship (<https://hsfcjombang.wordpress.com>). In this research, the researcher joined the community to get the data, because there are many registers that cannot be interpreted without joining the community.

1.2 Research Problem

1. What registers are used by HSFCJ motorcycle community in WhatsApp group chatting?
2. What are functions of these registers used by HSFCJ motorcycle community in WhatsApp group chatting?

1.3 Research Objective

1. To find out registers used by motorcycle community in WhatsApp group chatting.
2. To explain the functions of those register used by motorcycle community that found in WhatsApp group chatting.

1.4 The Significance of The Study

of language items associated with different occupations or social groups such as surgeons, airline pilots, bank managers, sales clerks, jazz fans, and computer communities.

1.6.3 Communities

Communities are people who live in certain areas and have the same habits to make the basis for greater interaction among members, compared to populations outside of group members. According to Hillery Jr. (1968) Community is a group of people who live in the area and have a relationship to interact with one another.

1.6.4 HSFCJ

HSFCJ is Honda street fire community Jombang, the community for the Honda CB150R user in Jombang, East Java. This community was created because of the unity in gathering, touring, and modifying. And the main reason for this community is passion and kinship. <https://hsfcjombang.wordpress.com>

1.6.5 WhatsApp

WhatsApp is an application for smartphones that are used to exchange messages. WhatsApp app uses an internet connection to communicate. By using the WhatsApp group, we can chat online with members, share files, exchange photos and more. HSFC Jombang also uses the WhatsApp group to communicate with fellow members. <https://www.WhatsApp.com/about/>

REVIEW OF RELATED LITERATURE

This part presents the theories that the researcher uses to analyze the data.

The explanation about the research subject that related to the thesis and also the related studies that closely similar to the topic of analysis in this research.

Language variety is used in society and community. It is from a different background. We have a variation of language; it can be from culture, region, profession, habit, etc. But we must understand our mother language. Then, they can learn the variation language.

Ismiyati (2004) stated another opinion dealing with language variety. She stated that a multilingual society consists of many different groups with different cultures and varieties of language. The writer concludes that every group of people use their own variety to differ from another, we can also say that language variety is also linked with the social environments such as social class, education, ages, and a number of other social.

2.1.2 Register

Registers are specific sets of vocabulary items associated with a different occupational group or the language of groups of people with common. For example, the language used by airplane, pilot, commentators, managers, climb etc. Holmes (2001). For most people, the conversation is the most common type of spoken language that they produce. But people typically listen to many different kinds of spoken language: television shows, commercials, radio or television news reports, classroom lectures, political speeches, sermons, and so on.

Written language also plays a very important role in daily life for many people Biber and Conrad, (2009). In general terms, a register is a variety associated with a particular situation of use (including particular communicative purposes). The description of a register covers three major components: the situational context, the linguistic Biber and Conrad, (2009).

Based on Halliday(1978), the special terms use the notion of context of the situation, such as:

2.1.2.1. The Field

It is what the language is being used to talk about, including the topic and interactants or what kind of language used; specialized knowledge of the field (E.g. scientist writing for an academic journal); Common knowledge of the field. (E.g. the reader of a newspaper article).

2.1.2.2. The Mode

It is the role language is playing in the interactional. The function of the text in the event, including therefore both the channel taken by the language

variety. The writer would identify some register which used in the motorcycle community. The writer analyzes the register which is used commonly in speaking

2.1.3. Meaning

Meaning is what is in their message to the recipient, and what is received from the current structure. The meaning of Hurford (2007) state can be divided into two parts, literal and non-college meaning. The online meaning raises two main meanings, first, the meaning of words and sentences basically do not depend on the context of use. Second the meaning of general expressions. The meaning of life shows the meaning of words in the language. For example, in the phrase "I am hungry", it can be well directly speaking that is hungry (Hurford, 2007).

Later, Saeed (2003) stated that the meaning was not stated directly. For example, in the sentence "I can eat horses", that does not mean that the speaker will really be a horse. That means the person really is starving Saeed (2003). The use of non-state languages has traditionally been called figurative and rhetorical studies include metaphor, irony, metonymy, synecdoche, hyperbole, and litote. Here is the explanation a metaphor is a statement that one thing is something else, or that a color is made between things that are basically not the same.

Authors are of different types on the list because they do not have literal facilities that are not members of the HSFCJ motorcycle community do not understand the meaning.

2.1.4 Function Register

Registers are unique words that belong to a particular group and only those groups can understand the intent of the word register. We can understand the function of the register from the statements of some linguists. Wardhaugh (2010) says that registering facilitates communication other than as a way to show identity and express feelings. From the statement above it can be understood that the function of the register is to communicate with others and as a means to express feelings and ways to show identity in a particular group.

Disseminate the above statement, implementation to express feelings and show the identity of the speaker (Holmes, 2012). Different groups of people who use them or them as a result of using the register. This type of register is to express feelings, support group members of people to show and explain their feelings. The last type of list can be used to show the effectiveness of communication, basically because they have made a vocabulary agreement.

CHAPTER 3

In this part, the researcher would like to explain a method that uses to analyze the data. In this research, the researcher uses the descriptive qualitative method. This part includes of research design, instrument, data and data sources, data collection and data analysis.

3.1. Research Design

The researcher conducted descriptive qualitative research. According to moleong (1990) “a qualitative research is a research without any calculating and numbering”. The researcher takes qualitative research because this research identified the register that is used in the motorcycle community’s language and describes the meaning of register word that is used in the motorcycle community’s WhatsApp group chatting.

This research focused on the use of register words motorcycle community. Those are meaning and function of register word in motorcycle community's WhatsApp group chatting.

3.2 Instrument

There were two instruments in this research. They were participant observation and interview. In this research, participant observation helped the researcher to attain the word register in the community's group WhatsApp. By joining the HSFCJ community's WhatsApp group chatting, the researcher focused to take the register that used among the members' conversations at WhatsApp

group chatting. The researcher wrote register that is used by the member of HSFCJ in group WhatsApp massagers.

Then the researcher got meaning and function of the register from interviewing the member of HSFCJ. The researcher interviewed five members, to get the meaning and the function of word register.

3.3 Data and Data Sources

The data in this research is register words that are used among the member's conversations at WhatsApp group chatting. The data were coming from the member's conversation and the researcher noted those word register in the field note. The data of word register were one word or phrase.

The source of data is from the participant observation of researcher joined the group WhatsApp of HSFC Jombang for two months and interview the members of HSFC Jombang.

3.4 Data Collection

In collecting the data, the researcher used the documentation method. The ways are the following:

- The researcher visited the motorcycle community's gathering. Introducing himself and the plan of his research.
- Then the researcher joined the WhatsApp group of HSFC Jombang.
- The researcher wrote or screenshot in their conversation from the member of HSFC Jombang in WhatsApp group to find the register words and phrases in two months.

- Table 4.2 English Register Used in Honda Street Fire Community Jombang.

19

RESEARCH FINDING AND DISCUSSION

researcher got consists of 17 English register words, 14 Indonesia register words, and one Java register words. All of the registers are showed in table 4.1.

Table 4.1 All Registers Used in Honda Street Fire Community Jombang.

No	Language	Register
1	English	Prospect, up, member, box, may day may day, no gangster, no toletot, start engine, optional reading, CC, homebes, speed freak, sport touring, raiser, newbie, portal, gas
2	Indonesia	Pengondisian, pantauan, kopdargab, kopsan, cibi, penjemputan, izin melintas, ban cacing, postic, NRA, R26, breket, tourwis, #086
3	Java	Sowan.

4.1.1.1 English Register

After the researcher conducted research for two months. The researcher got an English register. All the English registers showed in table 4.2.

In this table, the researcher shows the register, the meaning of register and type of meaning of register. Type of meaning classified in lexical and contextual meaning.

4.1.1.3 Java Register

The researcher got one registers in Javanese. It is a register word “sowan”.

It is described below.

Table 4.4 Java Register Used in Honda Street Fire Community Jombang.

No	Register	Meaning	Type of Meaning		Used in conversation
			Lexical	Contextual	
1	Sowan	Sowan is one of the ways requirements to be a member, by instructing prospect members to a certain place so that prospect members can find out a particular place and field on the way.		v	3

The three tables (Table 4.2, Table 4.3, and Table 4.4) show that each register has different meanings. Each word has contextual and textual meaning. Based on the table above there are several textual words and there are several other words that have contextual meaning.

The difference between textual and contextual meanings here is according to the meaning of words used in the HSFCJ motor community in the WA group.

Words register on the first conversation is "prospect" and "member" is the word register on the second conversation. The two word registers in the first and second conversations are the English word register used by the HSFCJ motor community. This register has a lexical meaning "prospect" (a person regarded as likely to succeed or as a potential customer, client, etc.) and "member" (a person, country, or organization that has joined a group, society, or team.).

While the contextual meaning and function of both registers obtained by researcher through interviews some members of HSFCJ. The "prospect" register has a contextual meaning that he is a new member who has not become an official member of the HSFCJ motorcycle community. Prospect are all newly registered HSFCJ members, all members who have not graduated and are still on probation. As with the "member", these register means that he is an official member of the HSFCJ motor community that has passed the prospect level. And, "member" is a member who already has an official registration number.

The researcher interviewed some members of the HSFCJ community to get the data. The function of the word "prospect" and "member" registers is as a differentiator between the new members who are still undergoing the prospecting process with “members” who have become official members of the HSFCJ motor community. Usually, the word "prospect" is written in the name of the new member and for the "member" is written the official member number behind his name.

This data is a permit to do the trip. This permit is often used to inform that members of the HSFCJ motor community want to travel. This letter is often used by members even every day there are uploaded in the group.

From the conversation, the researcher found registers “cibi”, “prospect”, “optional riding”, “pantauan”, “portal”, “no tetolet”, “not gangster”. It has Indonesian registers “cibi”, “pantauan/monitoring” (the lexical meaning is pantauan/monitoring: monitor results). And five English registers that some have the same meaning (optional: available to be chosen but not obligatory, riding: the sport or activity of riding horses, portal: a doorway, gate, or other entrance, usually a large and imposing one, no or not: used with an auxiliary verb or ‘be’ in the negative and gangster: a member of a gang of violent criminals.)

Contextual meanings and functions obtained by the researcher after conducting interviews. The word register “cibi” have contextual meaning is CB motor (motor used by motor community HSFCJ), “prospect postic” new boy who joined HSFC motorcycle club in Ponorogo, “optional riding” relaxing drive, the “monitoring” has meant monitoring the HSFC members from other areas that pass through Jombang. This word is usually intended for monitoring, viewing or supervising members of HSFC from other regions or Jombang region itself, “portal” welcome party for guests (members) from other community (region), this is the way to treat where members are served plenty of food or drink. Usually, the member who gives the "portal" is an official member. “No telolet” no horn suddenly, if you meet on the street say hello enough. “Not gangster” our bikers are not gangsters

The register word "Cibi" mentions the motor City Bike or abbreviated CB. "Postic" serves differentiator for members from other regions, because in every area there is usually a motor community that uses the same vehicle. In order to make it easier to know someone from the motor community from the region where it is a distinguished name such as jombang as HSFCJ while Ponorogo as Postic. “Optional riding” tell the other members that the members in question are riding in a hurry as the road passes. “Monitoring” has a function as an appeal to monitor other members from outside the region or jombang region itself, so that when members experience difficulties or if there are some emergency conditions, they can be immediately assisted or at least look for other members who can help. “Portal” serves to tighten fraternity, welcome other members and or mental tests

for members who are still in the prospecting process. “No toletot” serves to remind other members not to horn suddenly because it could endanger other riders, is because the horn of a motorcycle bike is very loud. “Not gangster” this word for as a reminder to all members that they are not negative gangsters, they are a motor community that is not like gangsters, and has a code of ethics and should do good and socialize with the community.

The figures below were found by the researcher on March 19th. Figure 4.1 and 4.2 are figures of conversations between several members in the WhatsApp group. In figure 4.1 shows about one member asking at 6:25 minutes then another member responds and figure 4.2 shows the conversation of some members who sell certain items.

Figure 4.2 *Box*

The two images above show there are two word registers used by the HSFCJ motor community. The first word is "box" while the second word is "raiser". Both include the English language register used by members of the HSFCJ motorcycle community.

placed behind. To install a box, a bracket is needed.

second word is “raiser” this word has meaning (Place to install a box).

Raiser includes a unique word that is owned by the HSFCJ.

this is a register that has a lexical meaning (a thing that increases the strength of something).

conversation took place at 13:54 on March 5, 2018. Figure 1 shows the researcher from conversations in a WhatsApp group that discusses motorcycle tires.

ook place at 13:54 on M

Data 4

motorcycle tires.

The screenshot shows a WhatsApp chat interface. At the top, a status bar indicates 'Signal', 'Wi-Fi', and '100%' battery. The chat header shows a contact named 'Fadhool' with a profile picture of a person with glasses. The chat history includes a message from 'Okelah' at 13:49. Below it, a message from 'Rizki Nur Hafidha' at 13:49 contains the text 'Larang r93.. gw sg hobby speedfreak.' and 'Ngebut niking2 🤔'. The word 'speedfreak' is highlighted with a red rectangular box. At the bottom, a message from 'Nur Afif M Aljabar' at 13:49 contains the text 'Larang r93.. gw sg hobby speedfreak'.

+62 812-5229-2481 ~Fadhool

+62 823-3253-8090 ~Nur Afif M Aljabar

+62 856-4825-6482

Larang r93.. gw sg hobby speedfreak

Figure 4.3 *Speedfreak*

"Speedfreak" is another register word found by the researcher in conversations between HSFCJ members in the figure. In this community, the word "speedfreak" has the meaning of inconsiderate or mentions to people or members who drive recklessly. This unique word has a lexical meaning (speed;

Data 6

This data occurred in a group conversation when one member asks about a motorcycle. This conversation occurred on March 7, 2018.

- Member 1 : Bensinku kok gelis entek kenek opo rek
(How come my gasoline runs out quickly, that's why my friends)
- Member 2 : CCne jalok dicilikno titik bro
(The CC asked for a slight reduction bro)
- Member 3 : Jawaban super
(Super answer)

The word that is registered in this conversation is "CC". This word has a lexical meaning (cubic centimeter). In the HSFCJ motor community, this word means knowing how fast the motor is. It can also be interpreted as the motorcycle's speed capacity from members. The conversation above occurred when one member asked why the bike could be wasteful of fuel. Then another member answer that "CC" from the vehicle needs to be reduced.

Data 7

April 8, 2018, in a conversation explaining that one member asks where the other is.

The above conversation contains the "gas" register. This has a meaning (petrol a liquid is obtained from petroleum, fuel, cars and other vehicles). The conversation talks about one member asking who will go to the meeting. Then some members responded to the question. The unique word "gas" in the HSFCJ motor community has the meaning departing or can I mean participate also can be interpreted to take a ride or start a drive can also mean going.

Data 9

The researcher got this data on 10 April 2018. The researcher got figure 4.4 contains some members who joked with other members.

Figure 4.4 *Newbie*

This conversation occurs between prospective members and official members. In this conversation, the researcher found the unique word register "newbie". A word that has a lexical meaning (someone who has just started doing an activity, a job, etc.). In the HSFCJ motorcycle community environment means the new kid or call a bar boy who does not know anything yet.

Data 10

This conversation took place on April 11, 2018. This conversation contains about one member of the HSFCJ asking for help to help others.

- Member 1 : Arek DBS kampas e entek nang perbatasan jombang pare
(Member from the community DBS pads to run out on the border of Jombang and Pare)

4.1.2.2. Indonesian Register in HSFCJ

Register in Indonesian word consist of sixteen unique words, they are “pengondisian”, “pantauan”, “kopdargab”, “kopsan”, “cibi”, “penjemputan”, “izin melintas”, “ban cacing”, “postic”, “NRA”, “R 26”, “breket”, “tourwis”, “#086”.

Data 1

3 April 2018 at 09.35, one of the members of HSFCJ invites several other members to meet.

Member 1 : Jumat **kopsan** okay
(Let's do kopsan, on Friday!)

Member 2 : Okay
(Okay)

March 28, 2018, at 08.32, one member remembers about kopdargab and responded by several other members.

Member 1 : Pagi..... H-4 **Kopdargab**, kompak dan semangat yaah....
(Morning H-4 Kopdargab, keep solid and don't give up!)

Member 2 : Pagi...
(Morning ...)

Member 3 : Aduh gak bisa ikut...
(Ouch, cannot come ...)

In the first conversation, the researcher found the register word "kopsan", in the second conversation "kopdargab". All two are Indonesian registers. They

The contextual meaning understood by members of the HSFCJ motor community is "Kopsan" means Gathering out of schedule, usually in unexpected places and attended by unofficially and officially members. "Kopdargab" means gathering fellow members of the motor community from other regions, sometimes depending on the motor plate of a certain area.

From the image the researcher found their two registers are “pengkondisian” and “up”. “pengkondisian” is the word register of the Indonesian

On 07 April 2018 at 1:46 p.m. the researcher got the conversation in the figure below talks about the price

conversation in the figure below talks about the price

conversation in the figure below talks about the price

Figure 4.7 R26

figure above, the researcher finds the unique word "R26" has meaning (R: 18th letter in alphabet and 26: number of spokes in the wheel). In the commitment of this motorcycle "R26" has 26 spokes in the wheel. In the conversation above, one member said that the R26 is expensive compared to the wheels of other motorcycles.

The researcher found this data on April 11, 1018. Conversations contained jokes between members.

11:46 ... 70%

Figure 4.8 *Breket*

From the figure above the researcher found the word register "breket". The above conversation is a joke from one member. One of the members said "ngonceng box ae... ndak usah breket" (hump box ae ... no need to brackets). The word "breket" in the HSFCJ motor community has the meaning of an additional box buffer. This word shows an additional tool to put the box to be added to the bun because, on every motorcycle, there is no tool to install the box.

Data 6

The researcher got this data on 15 March 2018 at 08.49. The conversation below contains an invitation to all members of the HSFCJ.

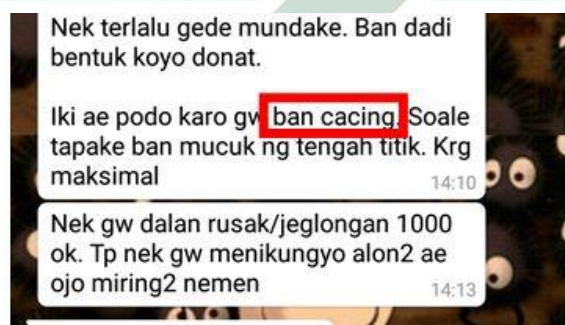

- Member 1 : Koyok e
(*I think*)
- Member 2 : **Tourwis** Yuk, akhir bln 4
(*Come on tourwis, end of month 4th*)
- Member 3 : Otewe
(*On the way*)
- Member 4 : Ayok

(Come on)

The underlined word is the word register found by the researcher. The register is "tourwis". The lexical meaning of the word "tourwis" is (touring wisata, touring: visiting several places in a country or area to perform, compete, etc. and wisata: *bepergian bersama-sama (untuk memperluas pengetahuan, bersenang-senang, dan sebagainya); bertamasya* traveling together (to expand knowledge, having fun, etc.); sightseeing). In this word, community means Invite vacation members not to get bored with club activities, and add knowledge of new places on prospect members. In the conversation, one member invited to do tourism activities and is responded by other members.

Data 7

This conversation took place at 14:10 on March 17, 2018. Figure 4.9 is a conversation conducted by one member, in this conversation one member gave information containing how to care for a motorcycle and appeal for caution.

Figure 4.9 *Ban Cacing*

From the figure above the researcher found the word register "ban cacing".

The lexical meaning of the register “ban cacing” is (ban/Tires: *benda bulat dari*

karet yang dipasang melingkar pada roda (sepeda, mobil, dan sebagainya) rubber round objects mounted on a wheel (bicycle, car, etc.) and *cacing/worms: binatang kecil, melata, tidak berkaki, tubuhnya bulat atau pipih panjang dan tidak beranggota (ada yang hidup dalam air, tanah, perut manusia, atau perut binatang)* small animals, creeping, legless, round or flattened and unmanned (some live in water, soil, human stomach, or animal stomach). In the community, this means the wheels of vehicles that are not in accordance with the Indonesian National Standard (SNI) and the indicators that are the tire is not SNI, not appropriate size.

4.1.2.3. Java Register in HSFCJ

The researcher got one register in Javanese word is “*sowan*”.

Data 1

Member 1 : Ayo sowan
(Let's sowan)

Member 2 : Ayo
(Come on)

Member 3 : Siap
(Ready)

Member 1 says "sowan", this is the register of the HSFCJ motor community. Sowan is a register in Javanese. In Indonesian, the word "sowan" can be equated with the word visiting or if in English has the same meaning with the word "visit". The lexical meaning "visit: An act of going to see a person or place

as a guest, tourist, etc". In HSFCJ the unique word "sowan" has the contextual meaning of Sowan daily is visiting the house of one member, and Sowan requirement to be a member. Sowan can be done anytime according to the agreement of all members. In addition to getting the contextual meaning, the researcher also got the function of this register word. The function of this register is to strengthen the fraternity of fellow members or visit the sick and can also be a requirement to become a member and increase knowledge about other cities for prospects.

4.1.3. Function

After conducting research and conducting interviews with several active members of the HSFCJ motorcycle community, the researcher found the function of the register used by the community. In this case, the researcher found four functions of the use of the register. These four functions are to show intimation, to show prestige, to increase solidarity, and to show identity.

4.1.3.1. To Show Intimacy

Some words that show intimacy are “sowan”. “Sowan” is usually said by HSFCJ members to call fellow members. This word serves to show intimacy between members of the HSFCJ motor community.

The function of “sowan” is to show intimacy between members. In this case “sowan” to strengthen the fraternity of fellow members or visit the sick and can also be a requirement to become a member and increase knowledge about other cities for prospects.

not understand the meaning of this word. When spoken, people know that he is a member of the community.

The word register "box" in the motorcycle community has meaning behind the motorcycle extra luggage. Motorcycle box is not always square. The shape is different. "Box" is placed on the right and left of the vehicle. It is placed behind.

Leahy (2006) stated that registers are sets of words used by different occupations or social groups such as scientists, managers, sales clerks, jazz fans, and computer

x is not always square.
placed on the right and left

managers, sales clerks, jazz fans, and c

ugh (2006) stated that registers are sets of a different occupations or social groups such as managers, sales clerks, jazz fans, and computer users. Registers often occur in motor communities. This study finds that the Street Fire Community Jombang motor community has 42 registers. The researcher made observations on WhatsApp group of the community. The researcher got 42 word registers used by group members. From the registers, the researcher found three types of registers: formal registers, informal registers, and slang registers. The community (they are shown in table 4.1). This answers the research formulation in this study. The previous research

analyzes the meaning of register. She found 21 registers used in Shooter movie. Fadila found 19 words and 2 phrase words in English. This research found sixteen registers in Indonesian, twenty-four registers in English, and two registers in Javanese. The researcher also found a register in Indonesian and Javanese because this study got the data in the motorcycle community in Indonesia, especially in Jombang.

By conducting interviews with five active members of the HSFCJ motor community, the researcher obtained the function of the register used by this motorcycle community. Wardhaugh (2010) says that registering facilitates communication other than as a way to show identity and express feelings. The results of the interviews show that there are four functions of registers used by the group members. They are the function (1) to show intimation, (2) to show prestige, (3) to increase solidarity, and (4) to show identity. From this interview, the formulation of the second problem can be answered.

Mujiono, Fauza, and Wilujeng (2017) analysis register in Indonesian nurses. The results of their study show that there are six reasons for CHC nurses to use the register. They are (1) to show a professional identity, in this case the goal of the nurse to show self-identity as a nurse who is professional and understands terms in science about nursing and medicine, in contrast to showing identity in the motorcycle community who only wants to show that they are members of the motorcycle community (2) to provide communication effectiveness, (3) to prove the strength of the data, (4) to provide data security, these three functions of registers in nurses does not exist in the motor community

CONCLUSION AND SUGGESTION

5.1. Conclusion

The second by conducting interviews with five active members of the HSFCJ motor community, the researcher obtained the functions of the register used by this motorcycle community. The results of the interviews show that there are four functions of registers used by group members. They are the function (1) to show intimation, (2) to show prestige, (3) to increase solidarity, and (4) to show identity.

5.2. Suggestion

The suggestion is may be considered for the reader, future researcher of the register, and another. The register is an interesting topic to learn. Registers are common in our society. It also can happen in any group of social such as motorcycle community, nurse community, photographer, etc.

The researcher hopes this research can make the reader deepen their understanding about the register. Especially in the motorcycle community's register, they did know the use of motorcycle community register. Hopefully, this study will give a better understanding of the motorcycle community register because the researcher analyzes the register based on the real motorcycle community.
